

NAMI Color

Improved & Functionalized

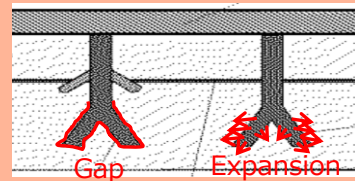

UPGRADE!

“NAMI Color” is a gap material for thermal expansion of refractory anchors.

- It vaporizes when heated, so the gap between the refractory anchor and the castable becomes the expansion allowance.
- Color-coding by material makes it easy to identify materials during storage and installation.

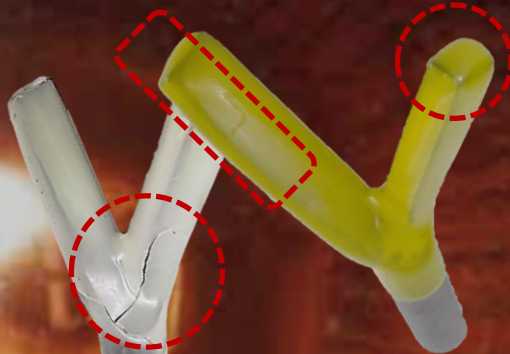

Material	SS	SUS 304	SUS 309S	SUS 310S	SUS 316 316L	
Identification Colors	Black	Yellow	Red	Green	Blue	Color-less

“NAMI Color” is a registered trademark of NAMITAKIKO in Japan patent.

POINT 1

Conventional NAMI Color

New NAMI Color

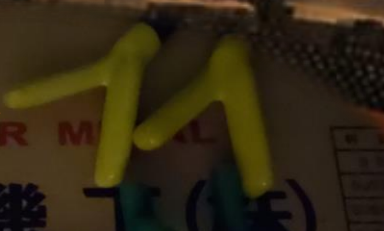

Improved edge characteristics and adhesion of the paint film, making it more difficult to peel off

POINT 2

Conventional NAMI Color

New NAMI Color

Identification colors are now more vivid and easier to distinguish even in dark areas
